

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Teva Pharmaceuticals USA Inc. is recalling specific lots of multiple products to the RETAIL LEVEL. These lots were distributed under the labels for Teva Pharmaceuticals USA Inc. and novaplus™.

This recall is being initiated because some manufacturing areas for the recall lots exceeded acceptance levels for microbial recovery. The trends were discovered during a standard review process for Environmental Monitoring of both, manufacturing facilities and personnel. It is important to note that at the time of commercial release, the lots in this recall met all test specification, including sterility. Based on available data, there is no indication of product quality and sterility failure. As such, the Health Hazard Assessment concluded that the likelihood of an adverse event is remote. However, if by a remote chance of exposure to a product with compromised sterility, severe adverse events could occur in susceptible individuals.
