

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to inform you of a product recall from Central Admixture Pharmacy Services, Inc. involving all products within expiration from CAPS's Lehigh Valley Outsourcing Facility (all lot numbers with the "3700" prefix). The affected products were distributed from the facility between October 7, 2022 and April 21, 2023. This recall has been initiated due to an observation by the U.S. Food and Drug Administration (FDA) of an alleged lack of sterility assurance for products intended to be sterile. Administration of a drug product intended to be sterile that is not sterile could result in serious infections that may be life-threatening. To date, CAPS has not received any reports of adverse events or patient injury related to the sterility of its drug products, but is issuing this recall out of an abundance of caution.
