REASON FOR RECALL

This recall has been initiated to the **retail level** for DAYTRANA® patches in lot 90764 because the number of customer complaints associated with Ripping Patches and Tight Release/Adhesive Transfer have exceeded the respective action limits for this lot.

As a result, patients and caregivers could potentially experience one or more of the following:

1. Transfer of adhesive from the patch to the liner when removing the liner.
2. Difficulty removing the patch from the liner.
3. Tearing of the patch while attempting to remove from the liner.
