

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to inform you that Sagent Pharmaceuticals, Inc. is recalling Nafcillin for Injection, USP. This recall is being issued out of an abundance of caution to the wholesaler and hospital/clinic level. The Contract Manufacturing Organization reported to Sagent that through routine environmental monitoring they detected procedural discrepancies associated with the cleaning and disinfection process at their production facility that may compromise the sterility assurance of the drug products. The procedural inconsistencies, coupled with inadequate validation, have prompted Sagent Pharmaceuticals to take this immediate action. Intravenous administration of a product intended to be sterile that is not sterile could result in serious systemic infections which may be life threatening. To date, Sagent has not received reports of any adverse events related to products subject to this recall. The product lots were distributed nationwide from May 2021 to April 2023.

Product	Lot Number	Expiration Date	NDC #
Nafcillin for Injection, USP 2 gram per vial	NFL101	1/31/2024	25021-140-10
