

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Exela Pharma Sciences LLC is recalling one (1) lot of Midazolam in 0.8% Sodium Chloride Injection 100 mg/ 100 ml (25 count cartons); impacted lot listed below. White particles were observed in the drug product retention samples. Particulates can create serious health risks when administered intravenously. There have been no reports of adverse events from the administration of the drug product from the affected lots. This recall is being carried out in an abundance of caution.

This recall is being made to the Dispensing Level and the following lot is listed in the table below. Distribution dates: 07/14/2023 - 10/17/2023

Midazolam in Sodium Chloride Injection is indicated as a continuous intravenous infusion for sedation of intubated and mechanically ventilated adult, pediatric and neonatal patients as a component of anesthesia or during treatment in a critical care setting.
